DIRECTION OF USE

SOAK OFF GEL POLISH REMOVER NAIL CLIPS

1. Soak cotton pad with acetone remover.
2. Place an acetone-soaked cotton pad on one nail. Ensure the pad is held securely covering the whole surface of each nail for the remover to be fully effective. Clip a gel polish removal nail clip over the top. The nail clips will hold the acetone-soaked cotton pad in place. Repeat this process on all 5 fingers.
3. Allow 10 – 15 minutes for soaking.
4. Remove the nail clips and cotton pads. The gel should begin to lift away from your natural nail plate. Use a manicure stick (not supplied) to gently remove the remaining gel. If the gel does not lift after 15 minutes, increase soak time by a further 10 – 15 minutes until the gel can be removed easily.
